- ☐ Kitty Litter/ Sawdust/ Sand
- ☐ Pack of Spray Bottles (another versatile and useful item)
- ☐ 4-6: 5-gallon buckets (buckets are versatile and useful for many tasks)
- ☐ Small Pails (2-3)
- ☐ Box of large black trash bags
- ☐ Box of regular trash 13-gallon trash bags
- ☐ Box of bio-hazard bags (for disposing of human and hazardous waste)

Tips!

1. For cleaning up, use water in spray bottles. This eliminates waste and is more convenient.
2. Use water stored in buckets to flush the toilet, like a civilized human being!
3. Fill bathtubs, buckets and pails with water as soon as practical to do so.
4. Be sure to carefully wipe down all food containers that have fallen into or been submerged in flood waters.
5. Wear disposable latex gloves when handling items damaged by or submerged in flood waters.
6. Thoroughly wash your hands immediately after handling anything touched by or submerged in flood waters.
7. Human waste and spoiled food must be carefully packaged and properly disposed of to prevent the spread of disease and attracting vermin.
8. Use personal wipes if water isn't available for personal hygiene needs.
9. Check with your insurance company for guidance on the claims process. Minimally, take pictures or record video for documenting damage for insurance purposes.
10. Only return to your home after emergency response officials have stated it's safe to do so.
